Muhammad Umer Akmal

Full-Stack Developer · AI Engineering

Open to Remote · Worldwide

PROFESSIONAL PROFILE

Results-driven Full-Stack Developer with hands-on expertise in building responsive, production-grade web applications using HTML5, CSS3, JavaScript, TypeScript, Python, React, Next.js, and FastAPI. Passionate about integrating AI capabilities — including the OpenAI Agents SDK — into real-world products. Actively seeking paid remote engineering internships and junior roles with international teams across the US, Canada, and Europe.

WORK EXPERIENCE

Full-Stack Developer

Feb 2024 – Present

Governor Sindh Initiative (GIAIC)

- Built AI-powered web applications using advanced prompt engineering and LLM integration techniques.
- Engineered full-stack interfaces with Next.js, React, TypeScript, and Tailwind CSS for performance and UX.
- Developed RESTful APIs with FastAPI and Node.js handling dynamic data flow between client and server.
- Contributed to decentralised application prototypes applying blockchain and Web3 fundamentals.
- Collaborated with a high-performing cohort on real-world AI and Metaverse projects.

Full-Stack Developer (Freelance / Self-Directed)

2023 – Present

Independent Projects

- Designed and built production-ready web apps with Next.js, TypeScript, React, and Python backends.
- Integrated OpenAI Agents SDK into web front-ends for autonomous multi-step AI task execution.
- Containerised deployments using Docker; managed CI/CD pipelines for zero-downtime releases.
- Built and consumed REST APIs with FastAPI — including auth, rate limiting, and pagination patterns.

NOTABLE PROJECTS

Agentic Task Execution System

Next.js · TypeScript · OpenAI Agents SDK

Autonomous multi-step AI agent integrated into a production web front-end — enabling complex reasoning, tool-use, and real-time task orchestration.

Cloud-Native Full-Stack Platform

Python · FastAPI · React · Docker

Scalable REST API backend with a React front-end; containerised deployment with CI/CD pipeline integration for zero-downtime releases.

AI-Powered Web Application

Next.js · Python · LLM APIs

Full-stack application with integrated LLM features — optimised for performance, accessibility, and SEO using server-side rendering and responsive UI/UX design.
